

German Roaches

Please follow these steps in order to prepare for a thorough and the most effective German roach treatment possible. **Remember the more you prepare the better job we can do.**

Kitchen

- ✓ Remove all items from cabinets and drawers. Make sure all countertops are completely cleared. Remove all items from on top of the refrigerator.
- ✓ No Need to move appliances like microwaves, blenders, coffee makers, Etc. Appliances should be left in the kitchen for treatment with dry powders and/or baits.
- ✓ Food and Dishes moved from the kitchen could be place in another room like your living room floor, or garage, outside, on the dining room table, just as long as these items are out of the treatment area and are covered with a linen or a plastic sheet.
- ✓ After the kitchen has been cleared a deep cleaning would be ideal. Sweep or vacuum under the refrigerator and stove. Wipe down walls and all surfaces.

Bathroom

- ✓ Remove all items from under the sink, medicine cabinet, and drawers.
- ✓ Remove toilet paper, Tooth brushes, sponges, towels and as many items as possible.
- ✓ Just as in the kitchen, a deep cleaning would be ideal at this time. Not only does it help control the roach population, but it also helps provide a clean surface for our products.

All other rooms

- ✓ Moving furniture a few feet away from the walls is recommended so that we may provide you with the most thorough treatment possible. A spot treatment off all base boards will be preformed throughout all rooms of your home.

Additional Preparations

- ✓ Remove pet dishes, water bowls and pet toys.
- ✓ Place a damp towel over fish tanks and turn off air pump. If this is not possible speak to us about alternative treatment options around your fish tank.
- ✓ All other pets including , Cats, dogs, reptiles, birds, ETC., should be removed from the premises.
- ✓ Prepare to leave the premises after the service anywhere from 1-4 hours depending on products used. The Technician will let you know how long you should wait before returning.

After Treatment

- ✓ After returning make sure to avoid all areas that may still be wet. Open windows, door and turn on fans is recommended in order to air out the premises. Clean all surfaces including counter tops, and mop floors avoiding 3 to 4 inches away from the base boards.
